WORK EXPERIENCE

MERN Stack Developer Intern, InternPro | *Jul 2025 – Sept 2025*

- Architected and deployed two fullstack MERN apps with JWT auth and role-based access control (RBAC) for multi-role workflows.
- Optimized MongoDB schemas, aggregation pipelines, and compound indexes, reducing average query response time by ~40%.
- Implemented real-time bidirectional communication with Socket.IO/WebSockets for concurrent multi-user messaging.

AI & Cloud Intern, Edunet Foundation | *Jul 2025 – Aug 2025*

- Performed end-to-end data preprocessing and EDA using IBM Watson Studio on IBM Cloud for real-world datasets.
- Developed and tuned ML models with AutoAI/SPSS Modeler, evaluating performance and iteratively optimizing accuracy.

PROJECTS

WellNest AI — Mental Wellness Platform | *React, Node.js, Express.js, MongoDB, Ollama (Local LLM)*

- Built a full-stack mental wellness platform with a local LLM-powered (Ollama, maxwell1500/psycho:12b) empathetic chat companion and a 20-dimension psychometric check-in engine generating clinical stress classifications and CBT action plans.
- Implemented JWT-authenticated Node.js/Express/MongoDB backend with a modular Ollama service layer, plus a React 19/Vite frontend featuring streak-based XP gamification, a dynamic StressMeter, and six adaptive themes.

AI-Powered Technical Interviewer Platform | *React.js, FastAPI, MongoDB, Ollama, Whisper*

- Built a full-stack interview prep platform with voice and coding assessments for role-specific technical interviews.
- Integrated Ollama (Mistral) for question generation, answer evaluation, and feedback, with Whisper for speech transcription.

AI-Powered Blog Platform | *React.js, Node.js, Express.js, MongoDB, Gemini API*

- Built a production-ready blogging platform with dual-role (user/writer) JWT auth and HTTP-only cookie sessions.
- Integrated Google Gemini for AI-assisted content generation and ImageKit CDN, cutting image load times significantly.
